

MID COLUMBIA ENDOSCOPY CENTER

2024 REPORT CARD

Adenoma Detection: For the colonoscopies performed at Mid-Columbia Endoscopy Center (MCEC) in 2023, we had an Adenoma Detection Rate of 40.50%, well above the National standard of 20%.

Colon Withdrawal Time: Our overall average colon withdrawal time is 10.91 minutes. Of the colonoscopies performed in 2023 that had no interventions or therapeutic measures taken (no biopsy or polyps removed), our average colon withdrawal time was 8.97 minutes.

Cecum Intubation: Of the colonoscopies performed at MCEC in 2023 we had a cecum (where the small intestine and the colon meet) intubation rate of 99.15%.

Bowel Preparation Quality: The number of patients who presented at MCEC in 2023 for colonoscopy with documented bowel preparation sufficient to have a thorough colonoscopy (excellent/good/fair/adequate) was 98.93%.
